**TRANSPOTEC LOGITEC WILL BE HELD FROM 27th TO 30th JANUARY
2022**

Milan, 29 April 2021 - Following recent government decisions, which do not allow trade fair events in Italy in the first half of June, and after a discussion with the market aimed at evaluating all possible solutions, the next edition of **Transpotec Logitec has been rescheduled for 2022** and will be held at Fiera Milano from **27th to 30th January**, confirming the event from Thursday to Sunday.

*"Defining a new time-frame was a complex decision, which we felt we had to take in full agreement with the industry. In recent months, companies, associations and the media have shown great confidence in us and have repeatedly stated that they want to come back to the fair and recognise the project. That is why it is important that they can do so at a time that they feel best suits their needs and allows them to express themselves to their full potential." - says **Paolo Pizzocar**, Exhibition Director of Transpotec Logitec. - "We have therefore chosen to set a new date in January, which is well suited to market expectations and allows us to fit into the international trade fair calendar without any particular overlap."*

So, thanks to a project focused on **sustainability, safety** and **professional resources**, which already has been very well received in recent months, Transpotec Logitec will be able to reconfirm itself as the reference showcase for the road transport and logistics sectors, offering a unique opportunity in Italy to present new products and services, launch vehicle previews, evaluate new products live and benefit from important training opportunities.

All information about the project can be found on-line at **www.transpotec.it**.
